Mac App

Prerequisites

- Mac OSX 10.7 or later
- Java installation from Oracle or Apple
- 1 GB ram
- 1024x768 display or greater

Installation

Select the “Install” button next to the Mac App. The installation will begin and the program will download.

Note: In some cases, you may be presented with a “Gatekeeper” warning that prevents you from installing the app. Select “Open” to dismiss the message and install the app.

If the “open” option is not available, you can right-click on the installation program and directly select “Open”. The dialog box should then give you the option to “Open” the installer.
Continued through the installation process until the application has installed.
After the application has installed, you can double-click on any downloaded .ARALOC file to view protected content.

For each issue, you will receive an email from natgeosupport@araloc.com with the link to download the issue. You may also find the links by going to the Teacher Tab on each magazine’s website at http://ngexplorer.cengage.com.

Windows App

Prerequisites

- Windows XP Service Pack 3, Windows Vista, Windows 7, Windows 8 or greater
- .NET 4.0 CLR
- 1 GB ram
- 1024x768 display or greater

1. ARALOC Windows Apps will run on full Windows 8 only. Windows RT “Tablet Only” versions cannot run the ARALOC Windows App. Windows Tablets running the full version of Windows 8, such as the Surface Pro, can run ARALOC Apps.

2. .NET 4.0 CLR is typically installed automatically though Windows Update.

Installation

Select the “Install” button next to the Windows App. The installation will begin and the program will download.

ARALOC App Launch Screen
You may see a warning confirming that you wish to install the application. Select “Install” or “Yes” to continue.

**ARALOC App Install Confirmation**

You will then see a installation dialog as the application is downloaded and installed.
In certain browsers, the installer will not launch directly. If your browser downloads an “.application” file, then you can simply click on this file to launch the installer.

If you do not have .NET 4.0 CLR installed you will see a message that informs you that is must be installed to use the ARALOC application. You can install the .NET 4.0 CLR by running Windows Update or by running it manually at the following address:

After the app has installed, you will see the login screen.

Log in using the credentials you received in your Welcome email or from your IT staff.
**iOS App (iPad)**

**Prerequisites**

- iPad 2 or newer
- iOS 6.0 or greater
- Valid Apple iTunes store account.

**Installation**

Use the “App Store” application located on your device to search for National Geographic Explorer for Schools.

After locating the application, install it by selecting the download button. The Apple App store may prompt you for a password at this time.

After installation, open the app by selecting the icon.

Log in using the credentials you received in your Welcome email or from your IT staff.

*Note: If you have App v. 1.0 installed, you will need to tap the Accounts icon, then tap the + icon, then enter your username and password.*
**Android App (Android-Based Tablets)**

**Prerequisites**

- Android Tablet
- Android 2.3 or greater.
- Valid Google Play store account, or other App Store account.

**Installation**

Use the “Google Play” application located on your device to search for *National Geographic Explorer for Schools*.
